

BENEFIT FROM THESE ADVANTAGES

“The all purpose little one”. Jungheinrich three-directional VNA-Truck EFX 100/125 (2,200/2,750 lb).

Space saving

High maneuverability for use in confined spaces.

Economical

Regenerative braking with energy reclamation. Optimum utilization of battery capacity through travel and lifting impulse control.

Safe

Triple brake system:
– regenerative
– hydraulic (load wheels)
– electro-magnetically raised spring pressure brake (drive wheel)

Universal

Free path and guided applications possible.

Good Visibility

Unsurpassed free visibility of the aisle, the forks and the load.

Comfortable and ergonomic

Optimum seat position through the adjustment facilities of the seat (to weight and height of driver) and the tilt of the steering column.

Persevering

Batteries of 400–600 Ah (48V) for long working hours.

Radio Data Terminal (Option)

Jungheinrich Data Communication means: coupling of the physical transport of goods with computer controlled information flow. This leads to optimum truck utilisation in production and warehouse.

Service friendly
Short downtimes through integral fault diagnostic system.

Easy Access
Easily opened covers and enclosures for fast access to all components.
